

ADSL INTERNET DEDICATED ACCESS

Description

Business Internet ADSL is the most affordable dedicated Business Internet solution and can be provided to companies that have several employees requiring simultaneous internet connectivity.

Business Internet ADSL service is complemented with downstream speeds up to 6 Mbps and upstream speeds up to 840Kbps. The ADSL option has a 15 GB data transfer limit.

Business Internet ADSL Extra offers, where ADSL 2 technology is available, a consistent speed of 16Mbps (available as of Monday, October 22nd, 2007), but if ADSL 2 technology is not available a version up to 6 Mbps is available.

Also, note that with ADSL Extra you have unlimited usage per month.

This service is best suited for businesses that require connectivity for critical applications such as Internet Surfing, Email and Web-Hosting.

Options

- The client may subscribe to the [IP Messaging Service](#). (Please note that if not installed at the same time as the Internet service, there will be a \$250 service charge.)
- The client may purchase additional IP addresses; the cost is \$20 per month per bloc of 16 addresses minimum, plus an activation fee of \$500.

Target Market

- SMB located in Ontario or Quebec with less than 50 employees or a small local network.
- Companies with servers that require a permanent Internet connection, 24/7.

- Customers seeking a fully managed internet solution.
- Company with several remote employees that require multiple static addresses.

Benefits

Business Internet Dedicated ADSL is the perfect service for companies whose day-to-day business applications are Web based and customers who use the Internet for crucial applications.

Its features include:

- Always-on dedicated access guaranteeing minimum speeds that are four times faster than non-dedicated service.
- Round-the-clock monitoring ensuring optimum performance at all times.
- Transmission rates that deliver download speeds of up to 6 Mbits/s and upload speeds of up to 800 Kbits/s. And they will keep getting faster every year.
- Eight static IP addresses or more to help you get the most from your applications. Especially useful when several users or servers need to be connected to the Internet at the same time.
- 24-hour mean time to repair (MTTR) guaranteed by a contract. So you have peace of mind no matter what happens.
- Personalized monthly reports on bandwidth usage to give you constant control of your activities. A high-quality Cisco router that combines robustness and reliability.
- In short, superior technology and service for unfailing performance from your business's mission critical applications.
- Add to all these advantages professional installation by Bell technicians and the ability to view usage data in real time
